I am proficient in **Django** and **Python**, and skilled in front-end technologies like **HTML**, **CSS**, and **JavaScript**. Currently, I am studying React to expand my knowledge further. I have hands-on experience in **API development** using Django and Flask, and have built websites and a custom calendar application for clients. Managing web hosting for 30 clients showcases my practical expertise. My bilingual proficiency in English and **Spanish** enhances my communication skills, making me a versatile and effective programmer.

Skills

Strong Knowledge:
- Django, Python

Proficient In:
- HTML, CSS, JavaScript

Familiarity With:
- React, Flask

Practical Experience:
- Full-stack Web and API Development (Django, Flask)

Education

Team Treehouse, Online—Python Development Techdegree Graduate
Calaveras High School, San Andreas, CA—High School Diploma, 2001

The Team Treehouse Techdegree required the completion of five graded projects. I completed each project with the highest possible grade. The projects can be found on my GitHub Repo at https://github.com/ericsryan. My portfolio can be found on my personal website, ericsryan.com.

Work History

Web Host, Self-Employed—2022-Present
Manage 30 websites for clients, assisting them in managing domains and hosting needs.

Successfully rebuilt two websites for clients.
